

DESCRIPTION:

This hands-on training course is targeted at new or experienced Apex users who want to learn more about creating or editing reports for use with Apex.

NOTE:

It is recommended that participants already have a basic understanding of using Crystal Reports with Apex as is presented in the prior 'Apex Crystal Reports Basics' class.

TOPICS:

Advanced Report Building Concepts

- Creating Parameters For User Selections
- Adding Groups, Summaries and Counts to the Report
- Using the Chart Expert to Create Graphs
- Adding Conditional Suppression
- Using the Crystal Crosstab Expert
- Linking Multiple Tables
- Creating More Advanced Formulas
- Using the Top N/Sort Group Expert
- Exploring Additional Apex Tables

Alternate Data Mining Using My Data Inquiry

- Using and Understanding Existing Queries
- Creating and Saving New Queries
- Exporting Query Results to Other Formats
