

DESCRIPTION:

This hands-on training course is targeted at those who are in the position to create 'Standard Operating Procedures' (SOP) within a Contractor or Supplier's use-case. This class will cover everything you need to standardize and help automate your entire procure to pay process. You will also be exposed to proactive best practices provided by the BuildIt system; these tools will allow you to manage the misplaced/incorrect information, rather than the entire material data stream.

NOTES:

It is recommended that attendees have some prior experience in buying, selling, tracking, and paying for Heavy Civil Bulk Materials.

TOPICS:

Setup

- Libraries
- Permission Types
- Cost Books

Order Sharing/Reporting

- Work-flow
- Data enrichment
- How to use your data
