

### DESCRIPTION:

This hands-on training class is for those with little or no experience with COMMANDqc and for those who want to know more about how COMMANDqc keeps track of materials information and generates materials reports.

NOTES: While this class includes a section on the basics of COMMANDqc for the novice, it will also dive into detail about setting up material management, entering material test results and generating material reports. Only the first hour of the 4 hour session will be introductory material.

### TOPICS:

#### **Introduction to COMMANDqc**

- The COMMANDqc Paradigm
- Different parts of COMMANDqc
- COMMANDqc icons
- Working with grid reports

#### **Creating Material Default information**

- Material Characteristics
- Suppliers/Sources
- Plant Assignments

#### **Setting up Materials**

- Suppliers/Sources
- Material Field Definitions
- Sieves
- Grading Specs

#### **Material Test Results**

- Aggregate Gradings and other tests
- Cement and fly ash tests
- Other tests

#### **Generating Material Reports**

- Material Analysis
- Aggregate Sample Reports
- Aggregate Grading Analysis

#### **Advanced Topics**

- Aggregate Blends
- Cementitious Blends
- Other Reports
