

### DESCRIPTION:

This hands-on training class will cover the many facets of how items and services are priced in COMMANDseries. We will cover the Pricing Hierarchy as well as utilities and settings such as update costs and prices, pricing options based on scheduling or pricing plants and calculating an across the board price update. An overview of product setup will also be covered.

### NOTES:

This session is designed for COMMANDseries Version 2 users and conducted in the COMMANDconcrete module. However, many of the topics covered will translate to COMMANDaggregate as well.
