

DESCRIPTION: This hands-on workshop is designed to provide a deeper dive into the TrackIt application. The TrackIt Advance Workshop will take users to the next level. Learn from our application delivery consultants how to integrate the TrackIt system into your everyday business practices.

NOTE:

Students should have a basic understanding of the TrackIt system or completed the Day 1 Basic sessions.

TOPICS:

Dispatch Customization and Preferences

TrackIt has many customizations and preferences that can be used to help you better manage your trucks and drivers in a way more natural to you, including topics like:

- Email Alerts – setup and management
- Customize Geofence and Truck rollovers with ticket data
- Control how drivers can communicate with you
- Make the MAP easier to use with customizations
- Customize things for the driver
- Localization - need the website or tracking device in Spanish, Russian, etc.? Learn how.
- Measuring Times through “Status Thresholds”

Command Alkon Product Integrations

Learn how to get the most of your Command Alkon products by utilizing integrations. There are many features available to you today to help you manage your fleet, including:

- Status and Command Events
- Status Mappings
- Concrete On
- Ticket Integration
- Load Event
- Scheduling Integration
- “Last Load”
- MapIt
- Fine Tuning TrackItWare Settings
- Future Integrations

Time & Attendance

Time & Attendance is a critical money-saving tool for many of our clients that pay hourly workers, including topics like:

- Basics - setup, use, and management
- Better manage “non-productive” time
- Integrations with dispatch systems
- Payroll expert - cost accounting and driver pay
